

AVOLUTION

AVIATION GROWTH CONSULTANTS

EFB Solutions & Support Your Outsourced EFB Team

Electronic Flight Bag (EFB) management and optimization services, enhancing efficiency, safety, and compliance across your entire fleet.

Our services include:

EFB Solutions & Support Services

EFB Administration & Technical Support: Managing operations, updates, and troubleshooting.

Gain full control of your EFB environment – from daily updates to advanced troubleshooting. Ensure compliance with ORO.GEN.205 standards and keep every aircraft in sync across FAA, ANAC, and EASA regulations.

EFB System Optimization: Enhancing performance & usability for flight and dispatch.

Across your fleet, EFB systems operate with maximum efficiency. From policy and risk analysis to reporting, every process is fine-tuned for compliance and performance. Pivot mounts ensure intuitive handling in any cockpit.

Training & Development: Building team expertise through tailored programs.

Empower your teams with hands-on, role-based training for EFB Managers, Administrators, pilots, and maintenance crews. Each program enhances technical know-how and supports smooth, coordinated EFB operations across all departments.

Software & Connectivity Solutions: Ensuring seamless integration with systems.

Operators rely on secure and efficient EFB software solutions – complete with MDM setup, installation, and maintenance for Windows, iOS, Android, and Linux. Reliable onboard, airport, and satellite connectivity keeps data flowing smoothly.

Compliance & Cybersecurity: Keeping systems secure and compliant with standards.

Stay fully compliant and cyber-secure. Our team manages CAA permit applications and audits aligned with EASA, ANAC, and FAA regulations. Continuous vulnerability testing protects sensitive operational data and strengthens system integrity.

Consultancy & Additional Services: Customized solutions to fit your evolving needs.

With tailored support, your EFB setup remains future-ready. We assess and optimize connectivity, charging, and mounting systems while providing clear documentation for hardware and software – ensuring consistent reliability and regulatory compliance.

MDM for EFB

Mobile Device Management

Mobile Device Management (MDM) ensures cybersecurity and operational efficiency across your entire EFB environment.

Manage all EFB devices securely and efficiently:

EFB Management with MDM

Integration & Performance

Strengthen security, ensure compliance, and simplify device management across all airline departments – for smoother collaboration and reliability.

Secure & Compliant Systems

Align MDM solutions seamlessly with your operational setup. Gain efficiency through centralized management and consistent compliance.

Tailored Solutions for Operators

Equip your airline with the right tools for safe, reliable, and efficient EFB operations. Robust MDM systems keep complex environments under control.

Recommended MDM Solutions

Miradore

Ideal for multi-platform use – simple, affordable, and quick to deploy. Its intuitive interface keeps everyday management effortless.

Kandji

Built for iOS/iPad fleets – streamlined control, intuitive setup, and automatic compliance management for Apple-based environments.

Microsoft Endpoint Manager ME

Complete control of mixed-device environments – integrating IT systems, mobile phones, and EFBs within your corporate ecosystem.

ManageEngine

Scalable management with strong security – ideal for growing organizations needing flexible, full-featured control and reliable performance.

AirWatch by VMware

Enterprise-grade performance with advanced policy enforcement – perfect for airlines requiring high-level security at scale.

SOTI MobiControl

A proven enterprise solution offering deep visibility and control – ideal for airlines managing diverse hardware and OS environments.

Choosing the Right MDM Solution

Evaluate, test, and select the system that best fits your operational and security needs. Expert guidance ensures your chosen MDM enhances safety, reliability, and regulatory compliance – optimizing every aspect of your EFB operations.

AVOLUTION
AVIATION GROWTH CONSULTANTS

Partner EFB Software Providers Integrated Solutions for Every Operation

Collaborate with leading EFB software partners
to enhance efficiency and compliance across your entire fleet.

Choose your EFB solution:

Recommended Providers

Aviobook

AVIOBOOK

Enhance cockpit and crew workflows with a fully integrated, pilot-centric suite that boosts operational efficiency through smart digital tools.

FlightDeckSoftware (FDS)

Customize every detail. This flexible platform—trusted by airlines like Norwegian Air and Flyr—delivers fast implementation and reliable performance.

Logipad

Simplify document management and real-time data access. A versatile, configurable system ideal for both pilots and ground staff.

EFB One by IFS

Operate across iOS, Windows, and Android with a cross-platform EFB delivering next-generation flight-bag technology on any device.

TailLog

Purpose-built for iPads, enabling smooth, seamless paper-free flight tracking and data management for modern airline workflows.

Boeing

Access a full suite of EFB tools – JDM Jeppesen Charting, e-Link, and OPT – with setup and administration tailored to your operations.

Additional Providers

Explore more industry-leading options to match your operational needs:

Bytron Skybook | Navblue | Collins | GE Aviation
Smart OFP | Flightman | FlightBrief | SOTI MobiControl

All supported within our ecosystem to ensure compatibility, security, and optimal performance.

Finding the Right Solution

Evaluate and test multiple EFB platforms to identify your best fit. Expert guidance ensures seamless selection, setup, and optimization – maximizing safety, reliability, and digital efficiency across your operations.

Take command of your EFB operations

Partner with Avolution EFB Solutions –
your trusted EFB team for integrated software, compliance, and operational excellence.
